The following is an examiner's statement of reasons for allowance: Kurby et al. (fig. 1), Sasho et al. (figs. 7-8) and Sato et al. (fig. 5) all use the input and output signals of cascaded amplifier stages to control the bias of one stage; however, the input signal used in all cases is that to the controlled stage rather than the input to the stage that the output signal used is taken from as would be required by the language of all of the independent claims as amended.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
